DETAILED ACTION

1. Applicant's cooperation is requested in correcting any error of which applicant may become aware in the specification.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The information disclosure statement submitted on 03/21/2001, has been considered by the examiner and made of record. See attached form PTO-1449.

Drawings

4. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 16-17, and 43-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Amersfoort et al. (5,629,992).

The Amersfoort et al. reference discloses in figure 13, an array waveguide grating optical multiplexer/demultiplexer comprising:

- input optical waveguide means (134) for receiving an optical signal;
- first slab waveguide means (138) connected to an output end (136) of said optical input waveguide means;
- arrayed waveguide means (140) connected to an output end of said first slab waveguide mean (138) for transmitting light that has traveled through said first slab waveguide;
- second slab waveguide means (142) connected to an output end of said arrayed waveguide means;
- output optical waveguide means (144) connected to an output end (143) of said second slab waveguide means ; and
- multi-mode waveguide is interposed between one or more of the single mode waveguides and the optical interaction.

With regard to claims 1-5, 16-17, and 43-45, the Amersfoort et al. reference discloses all the claimed invention of these claims.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6-15, 18-42 are provisionally rejected under the judicially created doctrine of double patenting over claims 18-22, and 30-42 of copending Application No. 10/067,943. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The claims of the instant application are broader than that of the patent and therefore the claims of the instant application are encompassed by the claim of the patent.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application.
